Govt defers debate on new FCRA Bill

JATIN ANAND
New Delhi, April 1

THE FOREIGN CONTRIBUTION (Regulation) Amendment Bill, 2026, listed for discussion and passage in the Lok Sabha, was not taken up on Wednesday amid intense pushback from opposition parties and concerns raised by Christian organisations and even BJP leaders of poll-bound Kerala.

The Bill was dropped from the initially-announced List of Business for the day during an intervention by Union Minister of Parliamentary Affairs Kiren Rijju.

He said the Bill was on the day's agenda of legislative business since it had already been tabled but would not be taken up for consideration. He said he had informed Opposition leaders about this during a meeting of the Business Advisory Committee.

Rijju accused Congress and Left MPs of "misleading" the House and the "people of Kerala about the FCRA... for the sake of elections".

The Bill seeks to amend the Foreign Contribution (Regulation) Act, 2010 which regulates the acceptance and utilisation of foreign contribution and foreign hospitality to "ensure that such inflows do not adversely affect national interest, public order or national security".

To be able to accept foreign contributions, NGOs and similar associations have to obtain

Commerce Minister Piyush Goyal speaks in the Lok Sabha on Wednesday as Parliamentary Affairs Minister Kiren Rijju looks on

registration or prior permission under the FCRA, 2010. Such contributions are divided under five broad heads: cultural, economic, educational, social and religious purposes.

The FCRA 2010 came into force on May 1, 2011 and has been amended in 2016, 2018 and 2020. According to the Bill, there are approximately 16,000 associations currently registered under the Act and receive around ₹22,000 crore every year.

At the core of the Opposition objection to the new amendment Bill is the introduction of "a comprehensive statutory framework" for vesting, supervision, management and disposal of foreign contribution and assets through "a designated authority", includ-

ing provisional and permanent vesting.

This, according to the Opposition and Christian organisations, will allow the government-appointed "designated authority" to take over, manage or dispose of assets created with foreign funds, including churches and educational institutions, if an organisation's FCRA registration is suspended or cancelled.

According to the Catholic Bishops' Conference of India (CBCI), among the first to express concern over the new Bill, it "threatens the operational survival of minorities, and civil society organisations that depend on foreign contributions for essential social, educational, and charitable work".

March UPI transaction value hits record high of ₹29.53L cr

FE BUREAU
Mumbai, April 1

UNIFIED PAYMENTS INTERFACE (UPI) processed record high transactions worth ₹29.53 lakh crore in March, up 10% from the previous month, according to data released on Wednesday by the National Payments Corporation of India. The volume grew 11% to 22.64 billion, from 20.39 billion in February.

The daily average transaction amount stood at ₹95,243 crore, marginally down from the previous month. The daily average volume increased by 2 million month-on-month to 730 million.

"The sustained growth in the digital payment ecosystem in India is an affirmation of the penetration of real-time payment systems in the day-to-day life of the people," said Anand Kumar Bajaj, founder, managing director and chief executive, PayN-

earby. "What stands out is the widening adoption across Bharat, where small merchants and consumers are increasingly embracing digital transactions."

Meanwhile, transactions through Aadhaar Enabled Payment System have climbed 23% to 111 million in March, amounting to ₹31,956 crore.

FASTag monthly volume rose 4% to 364 million in March and the value of trans-

actions increased 3.8% to ₹7,193 crore. Average daily transactions stood at 11.73 million clocking ₹232 crore in value.

Volumes of immediate payment service (IMPS) increased by 9% on month to 366 million and the value grew by 15.3% on month to ₹7,40 lakh crore. The daily average transaction volume stood at 11.80 million, slightly down from 12 million in February.

War takes a toll on capex plans

HOWEVER, AT ₹10.9 lakh crore in March this year, total project intent was the lowest since March 2021 when it was ₹5.3 lakh crore. In the preceding March quarters, it was ₹18.4 lakh crore in Q4FY24 and ₹18.8 lakh crore in Q4FY23.

The share of the manufacturing sector in the total new investment projects announced in Q4 was just 15.8%, or ₹1.7 lakh crore, the lowest since March 2023. It was highest at 67% or ₹6.6 lakh crore in the September 2025 quarter. The share of the services sector (excluding financial) was 68% (₹7.5 lakh crore) in the quarter, the highest ever since the agency began tracking the data. Madan Sabnavis, chief economist at Bank of Baroda, said investment decisions have been affected by the extremely uncertain environment relating to tariffs. "This is what has kept private investment cautious even after the GST cuts. The government, too, kept an eye on the fiscal ratios and hence fine-tuned expenditure," he said.

Capacity utilisation rose marginally to 74.3% in Q2FY26 compared with 74.1% in Q1FY26, data from RBI's Order

Books, Inventories, and Capacity Utilisation Survey show. However, it was lower than the 77.7% reported in Q4FY25, which was a 48-quarter high.

Gaura Sen Gupta, chief economist at IDFC FIRST Bank, said the sharp reduction in projects announced by the private

sector in Q4FY26 is unusual as capacity utilisation rates have picked up. "The West Asia crisis that occurred in March could have impacted sentiment, delaying further announcements," she added.

Projects completed in the quarter ended March totalled

₹2.8 lakh crore. Typically, March-ending quarters usually report higher completion of projects. In March last year too, projects worth ₹2.8 lakh crore were completed, higher than the average ₹2.6 lakh crore commissioned in the preceding four March quarters.

'Power transmission capex surge needed'

SAURAV ANAND
New Delhi, April 1

PERSISTENT EXECUTION BOTTLENECKS, ranging from right-of-way (RoW) issues to forest clearances, are threatening to slow India's ambitious ₹9.16 lakh crore power transmission expansion plan, even as electricity demand surges and renewable capacity scales up, a CareEdge Ratings report said.

The stress is already visible in project execution. In FY25, transmission line additions stood at 8,830 circuit-km, nearly 42% below the target of 15,253 circuit-km, underscoring the widening gap between targets and on-ground progress.

Delays are not isolated. As of January, 76 transmission projects worth over ₹93,000 crore under the tariff-based competi-

tive bidding (TCB) route were operational, but only a limited number were completed on schedule, with most projects facing time overruns of 3-18 months. The constraints stem largely from land acquisition hurdles, RoW challenges and delays in statutory approvals — factors that continue to weigh on the pace of grid expansion.

India's peak power demand is projected to jump to 458 GW by FY32, from about 275 GW as of mid-FY25, driven by strong growth in electricity consumption and rapid renewable energy additions.

To support this demand trajectory, the government has outlined a transmission expansion roadmap under the National Electricity Plan (NEP) 2022-32, entailing a total capital outlay of ₹9.16 lakh crore.
